Batch heaters and dryers by D&C Engineers

Three-ton asphalt batch heater and drive unit

We manufactured this unit at our works in the Midlands, to replace an existing unit which had an old-type gear drive with the gears mounted on the drum.

The new unit drives through a twin output gearbox directly onto the carrying rollers.

Asphalt dryer drum

D&C Engineers manufactures these units directly for the manufacturers of asphalt plants. We can supply them with or without insulated cladding.

We also manufacture all duct work and cyclones.

We look forward to hearing from you, D&C Engineers
